

Fat

This section includes:

- Fats
-

Do fats have carbs?

Fats usually do not have carbs and do not affect your blood sugar. However, some condiments and seasonings can contain added sugar you should keep an eye out for.

Should I eat food with fats?

Fats are part of a balanced diet. Your body needs a small amount of fat from your diet every day to help it work properly.

This guide helps you choose options with fewer saturated fats and more "healthy" fats.

FAT EXCHANGE

Fork Friendly Selections (Cal/g carb)

Serving Size

Product Picture

Serving sizes are determined based on 1 fat exchange = ~45 calories for most products.
